The Honorable Brent Scowcroft, Co-Chairman
Blue Ribbon Commission on America's Nuclear Future
c/o Timothy Frazier, DFO-DOE
1000 Independence Ave. SW
Washington, DC 20586

Dear Co-Chairman Hamilton and Co-Chairman Scowcroft:

SUBJECT: Private Fuel Storage, LLC

Private Fuel Storage, LLC is a private company formed fifteen years ago by a group of utilities to provide central NRC-licensed interim spent nuclear fuel storage and to address the nation's spent fuel storage needs. We were successful in obtaining a volunteer host community and, after a nine-year licensing proceeding, we obtained an NRC 10 CFR Part 72 license for a 40,000 MTU interim storage facility. Unfortunately, we are presently held up by state-level opposition which sponsored improper Department of Interior actions currently being litigated in federal court.

We have considerable experience and a wealth of lessons learned that we would be glad to share with the Full Commission and/or Storage/Transportation Sub-Committee. We respectfully request the opportunity to address either body to present our views and to respond to questions. We would request that representatives from our host community accompany us to this presentation. More information is available at the NRC under Docket #72-22.

We look forward to hearing from you to arrange schedules. Please feel free to contact me at jdp@dairynet.com or (608) 787-1236.

Sincerely,

PRIVATE FUEL STORAGE, LLC

John D. Parkyn
Chairman & CEO
